

**REMARKS**

The restriction requirement is respectfully traversed. The specification shows a common invention as a whole executed in various forms within its scope. There are no savings of search and examination effort but there are significant costs to an individual inventor and proliferation of patents compounds search problems for the public. The restriction should be withdrawn as a whole or at least restated as (I) FIGS. 1, 2A, 2B, 2C, 2D, 2E and (II) FIGS. 1 with 2E.

If questions remain, please call Applicant's attorney at the number given above.

Respectfully submitted,

ROBERT P. BISHOP, Applicant

Dated: November 2, 2006
